

How to Figure Out Your Water Bill Charges (2023)

The structure of your water bill includes fixed monthly charges called Readiness-To-Serve (RTS) Fees and variable charges based on usage. These RTS fees serve to cover a portion of the administrative costs and capital needs of the system. The RTS fees are based on water meter size and are derived using the American Water Works Association (AWWA) specifications which reflect the demand for service each customer places on the overall system.
